

DC Brushless canned pump

Model name : PB-M2

Characteristics

- Canned pump, the connecting part is sealless.
- The rotor is made of plastic magnets, and is integrally molded with impeller.
- The motor uses DC Brushless mold motor and makes it possible to increase the products life.
- The material of casing, back casing and impeller use PP(Polypropylene), which includes 20% glass fiber.

Specifications

Pump type	DC Brushless canned pump
Head	0.8 m (2.62 ft)
Flow	2 L/min (0.07 CFM)
Output	2 W
Input	3.5 W
Input Voltage	DC7~12 V
Suction connecting	Rp 1/4
Discharge Connecting	0.39inch diameter, hose connecting type
Dimensions	2.68(D)x3.19(W)x3.21(H) inch
Net Weight	0.23 kg (0.507 Lbs)
